

CAMPER EMERGENCY ACTION PLAN

EMERGENCY ALARM

- The alarm is high-low or warbling. If the alarm sounds all should take immediate shelter.
- A single blast indicates all clear.
- When you take shelter find durable shelter (dining hall, shower houses, nature lodge, etc.) If this is not possible take shelter in a ditch or low-lying area.

MEDICAL EMERGENCY

In case of a life-threatening medical emergency administer first aid as appropriate for the nature of the injury or illness. Immediately call 911 and notify the camp ranger.

- Review nearby automated external defibrillators (AED) located throughout the camp in the event of a heart attack

THUNDERSTORMS

Seek shelter during a thunderstorm. The risks associated with thunderstorms are:

- Lightning
- Flash floods
- Hail
- Tornadoes
- Downbursts and straight-line winds

Thunderstorm watch indicates conditions are favorable for a thunderstorm.

Thunderstorm warning indicates a thunderstorm is occurring in the area.

LIGHTNING

If lightning can be seen OR thunder heard it indicates a thunderstorm is nearby and you should seek shelter.

Wait for 30 minutes with NO lightning or thunder before leaving the shelter.

Precautions:

- Get out of the water immediately.
- Seek shelter, but if none is available go to the lowest area possible and away from trees.
- If in an automobile stay put.

TORNADOES

In the event of a tornado get as low to the ground as possible such as a ditch or low-lying area. Stay away from trees or any temporary shelters.

Tornado watch indicates that conditions are favorable for a tornado.

Tornado warning indicates a tornado has been spotted in the area.

WILDFIRE

If a fire is spotted yell FIRE as loud as possible. Have all individuals clear the area and move upwind and far away from the fire. Call 911 and then the Ranger.

UNAUTHORIZED GUEST

Report any suspicious or out-of-place individuals to your unit leader immediately. Do not approach the individual. Try to note as much as you can about the person's appearance.

EVACUATION PLAN

Emergency evacuation escape routes are posted in individual buildings and key areas throughout the camp property. Make yourself familiar with the routes from any area you utilize.

MISSING CAMPER

Collect and keep an accurate headcount and contact the Ranger as soon as it is determined a camper is missing.
